

THE SYSTEM IS TOTALLY CORRUPT!

Edgar L. Owen
the Smart Planet &
the Complete Theory of Everything
at EdgarLOwen.info

THE CORRUPT PLANETARY SYSTEM

1. The current System oppresses everyone except the elites who rule it. It's cleverly designed to covertly divert the time, work, and wealth of the people into total wealth and power for the elites.
2. The System is the ultimate evil. It actively destroys the environment and the natural systems of the planet. It creates perpetual wars resulting in the death and disfigurement of millions upon millions. It progressively reduces the majority of the world's people to economic serfdom and need, and it fosters poverty, famine and death. It withholds free education, health care, equal justice, protection from harm, and the basic necessities of life from the majority of the people of the planet.
3. This creates a global culture of massive corruption and anger which incentivizes everyone to become corrupt and hateful just to survive.
4. Thus, much of the populace becomes guilty of something, even if just a politically incorrect act, that can be used against them should they dare to dissent. In this way the entire global society becomes corrupt to maximize the obscene power and profits of the ruling elites.

DIVIDING THE PEOPLE

1. All over the world the System conquers and maintains itself by falsely dividing the people into opposing classes based on nationality, ethnicity, religion, race, gender, and beliefs. E.g. black versus white, and the Republican and Democratic parties and their ideologies. Through the System's control of a corrupt corporate media all classes are continually stirred up to blame each other for the problems actually inflicted on all by the System. This tends to divide the populace into a multitude of warring factions making unified dissent impossible.
2. The System also enforces a pernicious orthodoxy of belief which increasingly provides social benefits based on compliance.
3. The truth is that it's the System that oppresses all classes equally, and sets them against each other to divert their justified anger away from itself. As long as all classes blame each other for the grievances inflicted by the System they are unable to unite to change it. The System itself is the one true overwhelming problem!

THE ARMS OF THE SYSTEM

1. The corrupt System includes world governments which design and execute laws to rig the System to oppress and impoverish the people.
2. The military, police, intelligence, and prison complexes which enforce the laws made by governments to oppress and impoverish the people.
3. Traditional and social media which actively brainwash the people to believe the System is working on their behalf, but which actively attack, ridicule, exclude, and censor dissent.
4. The massive international corporate, banking and monetary System which uses monetary policy, rigged laws and paid advertisements to maximize profits over benefits for the people.
5. The sub 1% class of superrich super-powerful elites who amass obscene personal fortunes from the people through positions within the System, and buy stability and allegiance by paying the salaries of those willing to work with them.

THE FINAL CATASTROPHE

1. The greed of the elites is insatiable. The most successfully greedy for wealth and power naturally rise to positions of wealth and power within the System, so it's no surprise they use these positions to perpetuate and amplify the insatiable greed of the System.
2. Generally, the System in each country only provides enough benefits to enough people to suppress effective revolt while continually transferring as much of the wealth and power of the people to the elites as possible.
3. Rapidly exploding surveillance, technology, and weaponry is now making effective dissent increasingly impossible, allowing the elites to progressively transfer more and more wealth and power from the people.
4. The end game of this trend is total suppression of the people subjecting them to permanent serfdom, and even slavery, while an all-powerful superrich elite exercises total control over an increasingly disposable populace.
5. Unless the entire System can be reformed this final state of total permanent subjection becomes more and more likely ever sooner and sooner.

CHANGING THE SYSTEM

1. The only solution is for everyone to understand the System and totally replace it with a free, fair, benevolent and meritocratic system similar to that outlined in my talks and books on *The Smart Planet*.
2. Though armed revolution might seem justified it isn't the way because it could destroy the stability of social order and make things even worse.
3. The only solution is to fully understand the System and figure out how to truly reform it. The only solution is for everyone, of all classes, to unite against the current corrupt System that infects the entire planet and threatens to utterly destroy it. Only all people united are more powerful than the System.
4. Just imagine how effective it would be if everyone rose up together as one against the System and peacefully forced its total reform, installing wise and benevolent managers to transparently administer it for the true benefit of both people and planet.

THE SMART PLANET

1. What we need is an entirely new system that maximizes the wellbeing of all people on a maximally healthy planet.
2. This includes a single stable uniform code of rights and laws across the entire planet that ensures maximum personal freedom insofar as others and the environment are not harmed.
3. A global meritocratic apolitical administrative body staffed by the wisest and most ethical civil servants produced by a free global educational system specifically designed to produce them.
4. Actions and policies designed by scientifically forecasting their complete effects on all the interacting natural and human systems of the planet using a hyperintelligent real time AI simulation of all these systems. This ensures optimal actions and policies are intelligently selected based on scientifically forecasted results.
5. A free, equal justice system with elimination of victimless crimes, non-injurious arrests, victim compensation, reform rather than punishment, and % of guilt or innocence verdicts by objective scientific panels.

6. A free global totally secure interactive information system for communication, information access, monetary transactions, education, and entertainment that provides AI friends, mentors, advisors, and teachers to everyone.
7. Provision of the essential minimum needs of all people on the planet including a uniform guaranteed minimum income to everyone. Financed by a very small fraction of the immense wealth of the planetary economic system.
8. A free global ecommerce platform with no paid ads where the full social and environmental impacts of all goods and services are objectively rated and anyone can offer anything legal on a completely fair and level playing field.
9. The system financed by a single minimal uniform transaction tax on all financial transactions of all types that replaces all other taxes.
10. A single secure global e-currency whose supply is balanced in real time to the effective demand for goods and services to stabilize the economy, prevent price inflation, and preserve the value of money and savings.
11. These economic policies progressively eliminate the unjust portion of income inequality while rewarding everyone for their actual contributions to society as determined by the market itself.

These new Smart Planet systems working together give the Earth, our living planetary organism, an effective, smart, healthy, and benevolent planetary mind that optimizes its total wellbeing, and the wellbeing of all the people on the planet.

Please see the Smart Planet at EdgarLOwen.info as a suggested guide to the way forward. Thanks for watching and please remember to like and share my talks as widely as possible. Thank you!
